

# Backup and Disaster Recovery

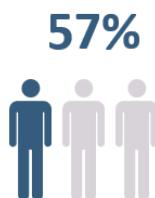

Resilience and trust. The currency of business.

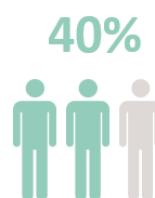

## The new normal.

Of organisations already victims of cybercrime

Of organisations will be affected in the next two years

Of organisations hit by disaster never reopen

\*2018 PWC South African Economic Crime Survey  
\*2015 Microsoft Boston Group Study

## Business downtime is out of business time.

- Business continuity concerns
- Operational problems causing revenue loss
- Unstable systems and data
- Security, governance and compliance risks

### Time to realise:

- Business speed and agility
- Affordable protection
- Uncompromised business continuity
- Unified data storage, access and management
- Always on security
- Minimal business disruption

## XContent Backup and Disaster Recovery

Our XContent Backup and Disaster Recovery methodology and technical ability (processes, tools and automation) can help reduce cost, improve reliability and productivity. Security rich and compliant across your business.

Critical cloud services to minimise risk, maximise security and keep your business moving forward.

Increased security.

Efficiency.

- Proactive security technology built in.
- Data and systems GDPR and POPI Act compliant
- Continuous monitoring
- Minimize the strain on internal resources so you can focus on what matters in your business.

You focus on your core business – we'll keep you agile and secure.

# XContent Backup and Disaster Recovery. Trust and resilience. Nothing else.

**SPEED**  
(productivity)

**AGILITY**  
(optimisation)

**GROWTH**  
(client connection)

**TRUST**  
(the currency of business)

Even a minor outage can put you at a disadvantage.

XContent assists with a business continuity plan that includes disaster recovery for all your major IT systems—without the expense of secondary infrastructure.

Protect all of your major IT systems. Affordably.

Tap into nearly infinite capacity at a moment's notice with our cloud-based data recovery solution.

Achieve business goals for continuity and compliance throughout the lifecycle of your apps. Help secure your data with industry leading protection offered by encryption features.

We test your business continuity plans, or run dev-test copies of production workloads in Azure whenever you need to, and without impacting users.
